

Brainerd Dispatch

Issued every Thursday morning at Brainerd, Minn. Terms \$1.50 per year in ADVANCE.

N. H. Ingersoll, Editor and Proprietor.
F. W. Wieland, Editor and Proprietor.

OFFICIAL PAPER OF CROW WING, CASS, FRANK AND AITKEN COUNTIES, and the City of Brainerd.

POPULATION OF BRAINERD 10,000.

Entered at the Post Office at Brainerd, Minnesota, as second-class matter.

Will the "proper time" ever arrive?

Election business is being thoroughly talked up by the different aspirants.

Joseph Wilson looms up very favorably for the auditorship and will undoubtedly be elected.

Fifteen saloons at Cedar Rapids, Iowa, were raided Sunday night, and "rum," "reform cider," etc., was confiscated.

Louisa M. Alcott advises her young lady friends never to think of attempting to receive a place in the departments at Washington.

Goodline keeps up the traditional reputation as the great wheat county of the state, and expects to harvest 3,000,000 bushels this year.

Dr. Howes is vigorously at work on the coming campaign. He seems to be aware that if he goes to the legislature he will have to rustle.

The people are fully convinced that the Tribune will say the word which is dubbed by that sheet. There is nothing like telling what you are going to do, you know.

Mr. Koop withdraws his candidacy for the legislature in order to produce and maintain harmony in the ranks. Such a course is certainly commendable.

The Tribune evidently was stirred up over "Koop's Kawkus" as it is dubbed by that sheet. It feels itself endorsed by being severely let alone. Very small favors are sometimes satisfactory.

We understand that Mr. George Holland will not decline the democratic nomination for the legislature if placed on the ticket. All reports to the contrary notwithstanding.

It has at last been decided to run Mr. N. McFadden for treasurer on re-election on what is known as the ring ticket. Mr. McFadden has made a very good effort but we think his opponent, Mr. A. E. Taylor will make the campaign a lively one for him.

The "Independent newspaper" seems to have given up the aggressive and is playing the martyr role very beautifully. Meekness and humility very often wins in the end, although it is sad to be misunderstood and abused. Such organs are always feeding on little crumbs of comfort.

Present appearances indicate that several heavy lumber firms, notably the Duluth Lumber company and Dyer & Co., will put no men in the woods the coming winter, and other firms will run very light in their cuts. All logs on hand will be cut before the mills shut down, as lumbermen seem naturally to prefer lumber to logs, but for the next year they will rely largely on what few logs are hung up.

The sale of Maud S. the trotting phenomenon, from Vanderbilt to Bonner, is matter for congratulation. It removes her from the speculation turf to an honorable, dignified and not inactive retirement. It is said Vanderbilt's motive in making the sale was to accomplish the result, and to escape the annoyances of Bonner's challenges to matches. In Bonner's possession the mare will make no matches and will not trot for money, though she occasionally appears on the track and will continue to make efforts to lower the record. Bonner believes she can trot, under favorable condition in 2:07. He paid \$40,000 for her.

The Anoka Fire.
Saturday morning fire swept the heart of Anoka as completely out of existence as can be imagined. Where six blocks of stores and bank buildings stood but a few hours before, the pride of every citizen, is now a confused scene of flaming and smoking ruins. The whole business part of the city was impartially included. The flames started in a privy adjoining Van De Walle & Page's roller skating rink, and when first seen were spreading up the hill toward the high school. This was 2:20 a. m. At 6 a. m. when the first fire from outside came in the shape of steamer No. 6 from Minneapolis, the destruction of the business part of the city was complete. The efforts of firemen and volunteers to narrow the course of the conflagration were unavailing. Every piece of wood, every box and plank found in the ruins was as dry as a bone, and instantly caught fire as the flaming current approached. To the last hope was placed in the courage and unceasing labor of the Anoka fire force, but at last aid was sought from St. Paul and Minneapolis, too late, however to accomplish any good. The fire showed no signs of stopping as long as there was a clean swath to the river, taking in its course the magnificent Washburn flouring mills as well as the opera house block, Hotel National bank building, and four score buildings that are usually to be seen in such a small city as this. The total loss cannot be less than \$600,000 to \$800,000, while insurance was held by companies represented by agents here. W. D. Washburn's loss was roughly estimated by him on his journey out here early this morning at \$175,000, with \$121,000 insurance. The citizens will take every possible action to aid the Washburn Mill company in rebuilding, and there is good prospect that the burned district will be rebuilt within the year.

Don't Agree with Villard.

It is stated in a pamphlet recently issued by the Oregon improvement company that the sale of the company's agricultural lands to the Oregon Railway and Navigation company reduced the floating debt about \$320,000, the number of acres sold being about 130,000 at \$4 per acre. The Oregon Improvement company invested about \$220,000 in the Cedar river extension of the Columbia & Puget railroad. This extension was intended to be built about 20 miles from Benton Junction to the Green river coal district, and was projected to become the owner of 30,000 of coal lands under the agreement made with the Northern Pacific Railroad company, through Henry Villard, then its president, to purchase the said lands at the agreement price of \$20 an acre. On the strength of this agreement the improvement company expended some \$77,000 on explorations, surveys, and in opening a mine, in addition to the \$220,000 before alluded to. The present management of the Northern Pacific Railroad company has declined to recognize the agreement between Mr. Villard and the improvement company, and up to the present time no settlement of the difficulty has been made. The officers of the improvement company have intimated that as the amount Mr. Villard agreed upon to sell 30,000 acres was probably more than the company would require for its use or some years to come, they would be willing to consider the acceptance at 4,000 or 6,000 acres, and it is expected that there will be a settlement on that basis.

Desperate Affray With Indians.

WINNIPEG, Aug. 19. A fatal affray occurred late last night on the bank of the Red river a mile below the city. Four men, employed in Drovers' brewery, rowed across the river to shoot ducks. After landing on the opposite bank a small body of Indians attacked them without reason. Four Indian squaws comprised the lot, but they were armed with knives. They attacked first Will-Preeze, one of the whites, and a big Indian seized him, but Rogers, another of the whites, released him. The Indian then seized the gun. Allan, another white then came up and seized the gun and tried to wrest it from the Indian's hand. In the struggle it went off, and a shot lodged in the lower part of the Indian's stomach. Other Indians came and engaged with the whites, the squaws doing all in their power to assist them by seizing the white men. The white men clubbed their guns, and the Indians used clubs and knives. One of the redskins seized on Preeze again and threw him on the ground, and when Rogers saw him he was kneeling over the old man with the knife raised ready to stab him. Breaking loose from the fellow who was holding him, he clubbed his gun and rushing up struck the murderous rascal a blow on the back of the head, felling him to the ground. An old squaw then seized him and while struggling to free himself from her he received a severe cut on the top of the head from a knife. The blood poured down his face. Footitt was having a severe struggle with one of the savages, and received a severe cut on the top of the head. Finally they all managed to break away, and made their way to the police station. The police scoured the neighborhood all night, and this afternoon found the dead body of the Indian whose name is Pete McDonald, lying in the woods, about two miles from the scene of the affray. Preeze and his companions are suffering greatly from the injuries received. Investigation will be held.

A cripple and a blind man fought in Pennsylvania. The cripple was killed and the blind man threw himself before and engine with fatal consequences.

Roscoe Conklin will vote for St. John for President.

Notice of Mortgage Sale.

Whereas default has been made in the payment of a certain debt secured by that certain mortgage, bearing date May 19th, 1884, executed by E. A. Loomis and Louis Fehr, mortgagors, unto Mary Ball, mortgagee, to wit: the payment of the sum of Five hundred and twenty-two dollars and no cents, with interest at the rate of six per centum per annum, according to the conditions of a promissory note of even date therewith, which mortgage was recorded in the office of the register of Crow Wing county, Minnesota, on the 10th day of May 1884, at 5:30 o'clock in the afternoon, in book of mortgages on page 22, and there is now claimed to be due on said mortgage and the debt thereby the sum of five hundred and thirteen dollars (\$513) including interest, and no proceedings at law or otherwise have been instituted to recover the debt secured by said mortgage or any part thereof. And whereas, by the terms of said mortgage it is allowed to the mortgagee and her assigns as attorney, fee in case of foreclosure of said mortgage, the sum of twenty-five dollars in addition to the amount then and there claimed to be due and unpaid.

And whereas, notice is hereby given that under and by virtue of the power of sale in said mortgage contained, and in pursuance of a decree made and provided, said mortgage will be foreclosed, and the premises there described, to-wit: Lot one (1) in block 60 in the town of West Brainerd, is said country, together with all furniture and fixtures now in and upon and upon said premises, will be sold at public auction to the highest bidder for cash, on the 28th day of September 1884, at 10 o'clock in the forenoon, in the city of Brainerd, Crow Wing county, Minnesota, in the sheriff of said county, on Saturday October 6th, 1884, at eleven o'clock in the forenoon, to satisfy the debt secured by said mortgage and interest thereon.

MARY BALL, Mortgagee.

W. A. FLEMING, Attorney for Mortgagee.

Dated August 21, 1884.

NOTICE FOR PUBLICATION.

Land Office at St. Cloud, Minn. August 19th 1884.

Notice is hereby given that the following named settler has filed notice of his intention to make final proof in support of his claim, and that said proof will be made before A. W. Foster, clerk of the District Court at Brainerd, Minn., on Monday September 24th, 1884, viz: Edgar E. Jones, of Crow Wing county, Minn., for the W. S. S. & Co. claim to section 34, Township 34, Range 32.

He names the following witnesses to prove his continuous residence upon and cultivation of said land, viz: Henry Root, E. E. Jones, E. H. Root and A. F. Hill all of Fort Ripley, Minnesota. D. H. FREEMAN, Register.

COSSIP FOR THE LADIES.

Marriage is in Mode.

A hot, a cold, A nobby beau! A narrow lane, A whither low.

A smile, a bow, A little flirt! An ardent vow, That's cheap as dirt.

A hand to signs, A girl to kiss, Quite at one's ease, Must needs be bliss.

A ring, a date, A honeymoon, To find too late, It was too late!

Dress Decorations.

Six yards of silk, American width, make a skirt, and a few ounces of embroidery silk may make it beautiful, quadruple its durability and value, and produce a garment that most women would cherish for life. Less than ten or twelve yards of silk do not make a dress with "shirts or dresses," and when it is made it is only presentable for a few months. So it is as a dress reformer that I urge women to stop making frills and quilts and substitute leaves and flowers as dress decorations. - Jane Grey Swisshelm.

A Coquette.

A coquette is a being who wishes to please. Amiable being! If you do not like her, you will have no difficulty in finding a female companion of a different mood. Alas! coquettes are but too rare. 'Tis a career that requires great abilities, subtle pains, a gay and airy spirit. 'Tis the coquette that provides all amusement; suggests the riding party, plans the picnic, gives and guesses challenges, acts thence, she is the stirring element amid the heavy congeries of social atoms; the soul of the house, the salt banquet. Let any one pass a very agreeable week, or it may be a day, under any roof, and analyze the cause of his satisfaction, and one might safely make a gentle wager that his solution would present him with the frothy phantasm of a coquette. - Dierckx.

Female Gamblers.

Another thing the women do, but less openly, says a correspondent at Saratoga, is to play cards for money, and many of the private parlors of the grand Union Hotel could tell pretty tales of fair faces, flushed neither with rouge nor wine, but the excitement of gambling. Betting at races, which has become so common among the ladies, has stimulated their love of chance, and the fashion of playing for gold has been brought over from Europe.

Women's Pets.

The relations between women and the dumb animals whom they keep and adore form a very interesting and complex question. The lady who is given to horses and to dogs regards them with a feeling altogether different from those entertained by men, who are, in a sense, equally devoted to both. Love, there is poetical authority for saying, makes up the whole sum of the existence of women, and is a thing apart to the life of a man; and the woman who has a dog for her stable and her kennel seldom finds time for anything else. The dog which she pets and the horse which she raises have a more vivid personality than they could possess for the sloughy soul of any of the lords of creation. The most enthusiastic panegyrist of animals have been wont to sing of King's White-Moist both of their loved dogs and horses, and described what may be called their inner life and emotions with pathos and power. Katherine, a most eminent trained by a loving, as well as by a knowing, hand to an immortal deed. But one must go to the novels of Ouida to find what dumb-animal worship really is. No doubt the animals themselves are perfectly aware of the intensity of the affection which they awake in the breasts of their mistresses. They do their best to reciprocate it, and thus there springs up between the dog or the horse and the lady a sentiment which is one of more than intelligent friendship, and almost approaches to the verge of romantic attachment.

Now Ostriches Beed.

After pairing, the ostrich begins to make his nest. It is the male alone that performs this duty. He does it in a square upon the ground, and balancing itself upon its sternum, it scratches up the earth with its legs and throws the sand behind it. When it has dug out enough on one side to suit it, it turns around and begins to dig on another side, and continues this operation until it has made a hole large enough for it to sit in comfortably. This nest is elliptical in shape, and is about 0.25 meters deep, 1 meter wide and 1.25 meters long. A few days after the nest is finished the female begins to lay one egg on every alternate day for eighteen or twenty days. She then rests for a while, which time varies from four to ten days, and then begins to lay more. A pair of ostriches will lay forty eggs. This is only the minimum number, which is rarely reached. It is not unusual for a well-fed, well-kept pair to yield fifty and even sixty eggs. The eggs are placed so as to leave no space between them. They are set upon at first for several hours each day, and finally altogether. The male and the female brood alternately. At night the male is always on the nest, as it possesses greater warmth than the female. When the birds relieve each other on the nest the new-come turns over each egg, in order that the portion which has lain against the nest, shall receive the warmth of the brooder. These birds perform their duties with the greatest skill, without any noise or breakage of the eggs. They squat down and with their head and neck rake up and overturn every one of the eggs, one after the other, without neglecting a single one. The incubation lasts forty-five days on an average, sometimes fifty days but never continues beyond that. When the chicklings hatch out they can be heard trying to break the shell of the egg. Sometimes they succeed in doing so, but usually the father breaks the egg under his breast bone, and seizing with his bill the inside skin tears it and frees the chickling. Upon first reaching the air the chickling remains limp and weak. But the warmth of the parent soon revives it, and in a few hours afterwards it begins to run about the nest, exercising its long legs, tottling over at each step, and recommencing again its stumbling journey. Four days after their hatching their chicklings begin to eat. They run after insects and swallow small pebbles. The father and mother do not help their little ones find food.

This nest is elliptical in shape, and is about 0.25 meters deep, 1 meter wide and 1.25 meters long. A few days after the nest is finished the female begins to lay one egg on every alternate day for eighteen or twenty days. She then rests for a while, which time varies from four to ten days, and then begins to lay more. A pair of ostriches will lay forty eggs. This is only the minimum number, which is rarely reached. It is not unusual for a well-fed, well-kept pair to yield fifty and even sixty eggs. The eggs are placed so as to leave no space between them. They are set upon at first for several hours each day, and finally altogether. The male and the female brood alternately. At night the male is always on the nest, as it possesses greater warmth than the female. When the birds relieve each other on the nest the new-come turns over each egg, in order that the portion which has lain against the nest, shall receive the warmth of the brooder. These birds perform their duties with the greatest skill, without any noise or breakage of the eggs. They squat down and with their head and neck rake up and overturn every one of the eggs, one after the other, without neglecting a single one. The incubation lasts forty-five days on an average, sometimes fifty days but never continues beyond that. When the chicklings hatch out they can be heard trying to break the shell of the egg. Sometimes they succeed in doing so, but usually the father breaks the egg under his breast bone, and seizing with his bill the inside skin tears it and frees the chickling. Upon first reaching the air the chickling remains limp and weak. But the warmth of the parent soon revives it, and in a few hours afterwards it begins to run about the nest, exercising its long legs, tottling over at each step, and recommencing again its stumbling journey. Four days after their hatching their chicklings begin to eat. They run after insects and swallow small pebbles. The father and mother do not help their little ones find food.

Now Ostriches Beed.

After pairing, the ostrich begins to make his nest. It is the male alone that performs this duty. He does it in a square upon the ground, and balancing itself upon its sternum, it scratches up the earth with its legs and throws the sand behind it. When it has dug out enough on one side to suit it, it turns around and begins to dig on another side, and continues this operation until it has made a hole large enough for it to sit in comfortably. This nest is elliptical in shape, and is about 0.25 meters deep, 1 meter wide and 1.25 meters long. A few days after the nest is finished the female begins to lay one egg on every alternate day for eighteen or twenty days. Local News

Plenty of rain this week.

Col. Canfield has returned to Brainerd.

The Fergus Falls roller rink is lighted
by gas.

Mr. Roth and family have moved to
St. Paul.

Considerable sickness is reported by
physicians.

G. W. Ingraham was in Duluth on
Friday last.

Chicken hunters are quite numerous
just at present.

Col. Baxter, of Fergus Falls, was in
the city on Tuesday.

Fred Puhler is now issuing an illus-
trated paper, at Duluth.

Dr. Landry has pulled in his shingle
and left for greener fields.

"Pensacola" says her sunflowers will
be ripe enough to husk in a few days.

Sol Smith Russell played to a good
audience at the opera house last night.

R. G. Sparks, who is at work for the
Canadian Pacific is visiting at Little
Falls.

Chas. White will have as cozy a resi-
dence as there is in the city when it is
finished.

The blueberry season has about closed
and it has been a very profitable one in
this section.

Mrs. J. O'Neil has leased the Tilley
saloon on Fourth street, and opened up
in good style.

WANTED—A good girl for general
house work. Apply to Mrs. C. F. Kin-
der, Sixth street.

Scofield & Buck have been busy this
week moving their stock of goods into
the Both store this week.

On the second page appears an inter-
esting interview with C. F. Kindred by a
Globe reporter at St. Paul.

WANTED—A good girl to do general
house work. Apply to Mrs. R. E. Gleason
No. 143, South Sixth street.

School district No. 1, Cass county, has
opened a school at Pillager, with Miss
Elita M. Stevens as teacher.

Too many barber shops will have the
tendency to bring the price of "sacrape"
down to ten cents in Brainerd.

Duluth is claiming the success of the
company of National Guards which
is to be mustered out at Little Falls.

Extensive arrangements are being
made for the county fair. The gentle-
men who have the thing in hand are
pushers.

A new tobacco store has been opened
on Fifth street by Sales & Nelson. A
fine line of smokers' materials will be
kept in stock.

S. W. Dinwiddie of Mille Lacs has
been awarded the contract of carrying
the mail from Brainerd to Garrison for
\$200 per annum.

J. and W. Theriot have opened a
wholesale depot for the sale of Ph. Best's
Milwaukee beer in the new Theriot
block on Front street.

The Northern Pacific trains are bring-
ing large numbers of empty cars from
eastern points, along the side tracks to
receive the new wheat.

Signor Brignoli and company failed to
materialize at the Opera House on Satur-
day night as advertised. What the rea-
son was has not been learned.

The new residence that L. P. White has
been building on 7th street has been
completed and is nearly ready for occu-
pation. It is a very fine building.

Wednesday night some one broke open
the tool chest at the new school house
and scattered the tools around premis-
ciously. Nothing of value was taken.

Mr. C. D. Church and Miss Mary
Mooking have, we understand, been en-
gaged to teach the East Brainerd schools
the coming year. A very good selection.

MARRIED—At the residence of the
bride's parents, Tuesday evening, Aug.
19, by Rev. W. W. Regan, W. M. Geddiss
and Miss Emma Powell, both of Brainerd.

Our brass band has been invited to at-
tend the grand tournament of bands at
Detroit. The Northern Pacific will
transport them free should they decide to
go.

John Cochran, the tonsorial artist in
Smith's Front Street barber shop, now
tells the dinner hour by a fine gold
timekeeper to which he treated himself the
first of the week.

Fred Puhler told a Herald representa-
tive last evening that the Duluth Morn-
ing Journal would blossom forth in ten
days or two weeks. He is at present per-
forming arrangements.—Duluth Herald.

Preparations are being made by Asso-
ciated Commercial for a banquet and hop
to take place September 10th, at their
parlors in the Masonic Temple. The
occasion is the constituting of the com-
mandery and the installation of officers.

Mrs. J. H. Bryant who has been visit-
ing with her parents at Green Bay, Wis.,
for the past five months, returned to this
city on Saturday last. Mr. and Mrs.
Bryant have commenced housekeeping
on Eighth street north.

Wm. Paine, jr., has re-opened his gun
store on Laurel street, next door to
Patek's furniture store. After looking
over several different places Mr. Paine
came to the conclusion that Brainerd
was equally as good as any of them for
business.

Burglars entered Chase's saloon on
Front street, Wednesday night and took
one thousand cigars. Nothing else was
disturbed although there were various
other articles of more value than the
cigars, but the thieves seemed to have a
weakness for smoking.

The refuse and dirt that is being un-
loaded along the track through the city
from the cattle cars does not have a very
savory odor, although we presume it will
aid the growth of grass and sod with
which the company propose to have their
grounds covered.

A roller skating race is down on the
books at the rink. It will take place
some day next week—the exact date is
not known yet—Mr. Max Stevens, of
Brainerd, and a man from below will be
the contestants. This race will be an
exciting occasion.—Sault Centre Tribune.

The heavy rain of last Saturday inter-
fered with the excursion down the river
which the band boys had arranged, and
consequently it was postponed for one
week and will take place on Saturday of
this week. The boat will leave at one
o'clock and return at 11 in the evening.
The price of tickets is 50 cents and 25
cents for children. Music by the band
and everything necessary for a good time
will be provided.

Death of Ed. R. French.

DIED—At his residence in this city,
on North street, August 20, 1884, Ed.
R. French, aged 65 years and 6 months.

For some days it was known that Mr.
French was quite sick but until the day
before his death no serious doubts as
to his recovery were entertained. He had
not felt well for several days, but did
not take to his bed until last week Wed-
nesday when Dr. J. C. Rosser was called
who did all that was possible for human
aid to do. The disease was lung and
other complications set in, in which,
congestion, finally resulted in his death.
At no time during his illness did he think
that he was in danger and even when Dr.
Hawley was called in for prayer he did
not seem to realize the situation.

The morning previous to his death he sat up
on the edge of the bed and conversed
with his wife and family, but was so
weak that it was evident that life could
hardly linger more than 24 hours at the
most, and at fifteen minutes past 12
o'clock noon on Wednesday he breathed
his last, passing away very quietly and
without pain.

Mr. French's father and mother was
the first white couple married in the ter-
ritory of Minnesota, the ceremony being
performed at Fort Snelling, November
26th, 1836. His parents returned to
Zanadua, Ohio, where he was born in
January 1838. Mr. French's early life
was spent in St. Paul, where he enlisted
in the army March 18th 1862, in company
G, of the 5th Minnesota, and was married
to Emma E. Sackett at St. Paul, July
14th 1864, while home on a furlough.

He was mustered out of the service Sep-
tember 6, 1864.

In 1872, twelve years ago, when
Brainerd was a new town he settled here
where he has since resided, during which
time he has been connected with, and
foremost in nearly every public enter-
prise that has been put forward in the
city, and was at the time of his death an
honored member of the city council.

He has been a member of the order of Odd
Fellows since 1860, and of the U. A. O. D.
since 1881, and in both orders he has been
a diligent and tireless worker. He united
with the G. A. R. Post here at its organiza-
tion and in the latter order he will be
greatly missed.

Mr. French leaves five children and a
wife to mourn his death. His father is
still living and resides in Washington
as does his brother; he has another
brother in Baltimore, and a sister in
Brooklyn, New York, and also a number
of relatives living at Farmington, this
state. Mr. French made ample provision
for his family by having a life insurance
of several thousand dollars which, to-
gether with the property in this city will
leave them in comfortable circumstances.

The funeral took place this Friday
afternoon at 2:30 o'clock at the Episcopal
church, the services being under the
auspices of Widly Lodge, I. O. O. F. of
which lodge he was an active member.

Moquette Carpets With Borders to
Match.
We have the loan for a few days of a
large line of samples of Moquette, body
and border, made in the best of manu-
facture. They are the very latest
Oriental designs, and the richest goods
ever shown in the city. Call early to see
them, as the lot will be returned on Wed-
nesday next.

DAY & MEAGHER.

Their Jealousy Aroused.
Brainerd claims to have raised an
Early York cabbage that weighed fifty-
six pounds. Those persons who are ac-
quainted with cabbage culture will smile
at such a tale, and the paper that printed
it shows its high knowledge of agricul-
ture. Perhaps forty-five pounds of sand
may have been added to the weight of the
whole thing was weighed as cabbage—
Sault Centre Tribune.

Proceedings of the City Council.
COUNCIL CHAMBER, Brainerd, Minn.,
August 18, 1884.

Meeting called to order by Mr. Presi-
dent.

Roll called.

Present: Ald. Taylor, Watts, Ort and
Forsyth.

Ald. Ald. French and Slipp.

Minutes of last meeting read and ap-
proved.

Moved by Ald. Watts and seconded by
Ald. Ort, that the communication from
